

MENINGITIS B PETITION – HELP US SAVE LIVES

Meningitis B is the leading cause of bacterial meningitis in Ireland, particularly affecting infants. Ireland has the highest rate of cases in Europe. 1 in 10 affected will die and 1 in 5 will be left with life-changing side-effects.

Our children are not protected against this disease.

Join us in our campaign to get this vaccine introduced. There is a licensed vaccine available which could end this suffering. Act now and help us bring the vaccine to Ireland.
